Career Objective

Aspiring **Frontend Developer** with hands-on experience in **React.js, JavaScript, HTML, CSS, Tailwind CSS**. Seeking an entry-level opportunity to apply my development and design skills in building responsive, intuitive, and user-focused web experiences while growing within a professional team.

Education

Bachelor of Computer Applications | Goodwill Christian College for Women |**2023**

- Achieved **79.85%**

2nd PUC | St. Charles Women's PU College |**2020**

- Achieved **69%**

SSLC | St. Mary's English High School, Hebbagodi. |**2018**

- Achieved **79%**

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, React.js, Tailwind CSS
- **UI/UX & Design:** Figma, Responsive Web Design
- **Programming:** Java, Python
- **Version Control:** GitHub/GitHub Pages
- **Database:** MySQL, MS Access
- **Tools & Libraries:** Vite, ShadCN UI, Recharts
- **Soft Skills:** Communication, Problem Solving, Creativity

---

Certifications

1. **Sony AITRIOS Hackathon 2025: Team: Smart Knitting** Achieved 1st runner-up position in the Sony AITRIOS Hackathon 2025, a competition focused on developing Edge AI and Vision AI solutions for sectors like manufacturing, retail, and logistics. Our team, Smart Knitting, developed an AI-powered fabric defect detection system using Sony's IMX500 image sensor

and AITRIOS platform, enabling real-time quality control in textile manufacturing. Contributed to model optimization and system integration, enhancing defect detection accuracy and operational efficiency.

2. **WEB DEVELOPMENT:** Hands-on experience in web development through coursework and an additional certification course in **HTML, CSS, JavaScript, PHP, MySQL.**

Projects

Airbnb Clone | React, Tailwind CSS, ShadCN UI, Vite

- Developed a responsive Airbnb-inspired web application using **React, Tailwind CSS, ShadCN UI, and Vite.**
- Implemented property browsing, search, category filtering, property details, favorites, trips, wishlists, authentication, and help-center features.
- Built reusable React components and Context API-based state management for authentication, search, favorites, categories, and bookings.
- Implemented responsive layouts for desktop and mobile devices and deployed the application using **GitHub Pages**.

Airbnb Admin Panel | React, Tailwind CSS, ShadCN UI, Recharts, Vite

- Developed a responsive admin dashboard for managing properties, bookings, guests, analytics, messages, and administrative settings.
- Built interactive dashboards with revenue, booking, and property analytics using **Recharts**.
- Implemented booking and property management with search, filtering, sorting, detailed views, and status tracking.
- Developed authentication, protected routes, profile/settings management, and dynamic dashboard statistics using React Context API and local storage.
- Designed reusable UI components with **Tailwind CSS** and **ShadCN UI** and deployed the application on **GitHub Pages.**
